

To all ULWSA Community Members,

Many of you are already aware of planned work by Range to run fiber cable throughout the subdivision this summer. We recently talked to their representative on this project and wanted to share currently known info with you. Please know that the status and info we get may change as this is a large project with multiple players. If anyone hears conflicting or additional info, please let us know.

- All subdivision roads and all resident driveways will be dug into and or trenched...as needed to provide for this upgrade. There is no current conduit to speak of that is available to run the new cable through.

- All homes, and or boxes where no residence exists, are expected to have fiber cable run to them this summer. This is only the lines...service and or upgraded/initial Range services across these lines is something you'll work with Range individually.

- The subcontractor who will do this work should begin arriving in ~2 weeks.

- Work should start early May

- Pre-construction planning should start within ~2 weeks.

- Weekly status meetings are planned once construction begins to assess progress, field issues/complaints, and assess the pre/post condition of roads/drives as the crew finishes a section.

- Range has offered to include point people at the pre-construction and weekly progress meetings. For the HOA, Chris Rodkey (307-450-8007) and Wayne Stocker (970-829-2418) will join meetings and communicate back to the community with updates - we'll do this via the web and via email addresses we have for many of you.

- Due to this upgrade work by Range, we will delay all routine road maintenance until the end of summer. At that time, we'll re-assess conditions and decide on what if any work should be done.

Wayne and I will gladly field any questions and will get you all the best answers we can, as fast as we can. Please use the Contact Form on the ULWSA website at [www.ulwsa.com](http://www.ulwsa.com) or email directly to the Board's email address at [boardofdirectors@ulwsa.com](mailto:boardofdirectors@ulwsa.com). Of course, you can also send a hardcopy letter to us addressed to "Board of Directors ULWSA, POB 692, Dubois, WY 82513"

Please send your email and other contact info to the Comms Working Group at "[ULWScommunication@gmail.com](mailto:ULWScommunication@gmail.com)" if you are not sure we have your email address. It is a fast and effective way of communicating with you all on subdivision happenings.

Thank you!

Your ULWSA Board of Directors
